Paired LVEF and LVESV at baseline and during the follow-up. A. total patients; B, patients with baseline LVEF > 35%; C, D. patients with baseline LVEF ≤ 35%. LVEF, Left ventricular ejection fraction; LVESV, LV end-systolic volume. N/M, N means the number of patients who had completed the follow-up of 6month/1year; M means the member of patients who should complete the follow-up of 6month/1year. **P<0.001, *P<0.01, compared to baseline LVEF. LVEF, LVESV
