Adenosine 12mg bolus IV
Amiodarone bolus 5mg/Kg/30’
Then 5-8μg/min/9h
SVT before ablation
Eccentric A activation, A earliest at CS 3,4
PPI = 62 ms -> AVRT by conceal left posterial AP
Mapping and ablation AP
A activation change during ablation
SVT before ablation

SVT after ablation
SVT after ablation – The same CL but A activation change!
Continue mapping and ablation AP
After ablation VAD 490ms, can’t initiate SVT
