Figure 1: Ablation of AVNRT from right slow pathway in RAO 30, 0 (right) and LAO 30, 0 (left)

Figure 2: Ablation done retrogradely from LV side, towards the LV septal in RAO 30, 0 (right) and LAO 30, 0 (left)

Figure 3: EGM showing slow potential documented from LV side (yellow arrow) during ablation followed by junctional rhythm. His signal was tagged from RV side.
